

The Curious Incident of the Dog in the Night-Time

Content Information

This play follows the journey-quest of an autistic teenager. The production may provide challenges for photo-sensitive persons, audio-sensitive persons, and persons who may find depictions of instances of sensory over-stimulation distressing. Additionally, there is a character that over-consumes alcohol, a very brief scene of simulated violence that is staged abstractly rather than realistically, a prop dog that has been murdered, and occasional coarse language.
